

MORNING SUMMARY

State of the Art: ~~Apple~~ Apple Notification Summary

- Little known feature introduced in iOS 15
- Really compelling UI
- Doesn't break you away from the phone at all

Up Next: Return (sort of) to the Classics

- All the critical information, none of the distractions
- Custom data sources for me (iMessage, Things.app, Oura, etc)
- Alarm integration? Always same time (8am?)
- Raspberry Pi powering the whole thing (I have one lying around I think)
- Alternatives to receipt printer:
 - o E-ink screen (Kindle, Remarkable)
 - o Mirror led?
 - o Small paper printer (post-it size)
